SUMMARY

Frontend Developer with 5+ years of experience specializing in building scalable, tested, and user-focused web applications using modern technologies such as React, Next.js, and TypeScript.

EXPERIENCE

Frontend Developer

Feb 2024 – Jan 2026

Retter

Remote

- Developed modern, high-performance, and fully responsive web applications from scratch using React.js, Next.js, and TypeScript.
- Owned the frontend architecture of the Gain Backoffice application using React, TypeScript, Zustand, MantineUI, and React Query.
- Rebuilt the Gratis corporate website with Next.js and TailwindCSS, implementing SSR for SEO optimization.
- Designed a reusable UI component system using Storybook with ARIA accessibility best practices.
- Improved perceived load times by over 40% using code splitting, React.lazy, dynamic imports, and intelligent prefetching.
- Integrated secure 3D Secure payment systems including Mastercard NestPay and Iyzico for large-scale e-commerce platforms.
- Implemented full Google Tag Manager e-commerce event tracking for analytics and conversion measurement.

Frontend Developer

Mar 2022 – Feb 2024

Octovan

Remote

- Refactored a large-scale B2B platform using React 18 and TypeScript, improving maintainability and type safety.
- Led frontend architecture of a B2C platform using Next.js 13 App Router, implementing authentication and delivery flows.
- Built reusable UI components and utilities using React, Zustand, and Tailwind CSS.
- Improved UX with loading feedback systems and error boundaries across complex user flows.
- Worked in agile teams using Jira, Bitbucket, and Vercel for CI/CD and deployments.

EDUCATION

Suleyman Demirel University

2018 – 2022

Bachelor of Computer Engineering

Isparta , Turkey
